

Hormone Replacement Fee Acknowledgment

Preventative medicine and bio-identical hormone replacement is a unique practice and is considered a form of alternative medicine. Even though the practitioners are board certified as Medical Doctors and Nurse Practitioner's, insurance companies do not recognize it as necessary medicine, BUT is considered as cosmetic/esthetic medicine and therefore is not covered by health insurance in most cases.

InShapeWV is not associated with any insurance companies, which means your insurance company is not obligated to pay for our services (consultations, insertions or pellets). We require payment at time of service.

For patients who have access to a Health Savings Account, you may pay for your treatment with that credit or debit card. This is the best idea for those patients who have an HSA as an option in their medical coverage.

In Office Initial Labs: Women \$233.10, 6-week post pellet labs range from \$92 to \$124.75

In Office Initial Labs: Men \$237.14, 4-week post pellet labs range from \$83.05 to \$136.24

(lab orders may be given to take to Lab Corp and turn in on your insurance, previously drawn labs may be used if they are no older than 6 months)

Initial Consultation Fee & Any Additional Office Visits (includes lab reviews) \$49

Female Hormone Pellet Insertion Fee (includes the cost of your pellets) \$400

Male Hormone Pellet Insertion Fee (includes the cost of your pellets) \$800

We accept the following forms of payment:

Master Card, Visa, Discover, HSA Cards, Care Credit and Cash.

Typically, women get pelleted every 4 to 5 months and men get pelleted every 5-6 months. Supplements that may be recommended and vary by patient based on your symptoms and needs.
